

## Qualified Entity Service Availability Disclosure

Qualified Entity Name: Bronx RHIO

Geography Served: New York City including Bronx and Neighboring Counties

Effective Date of this Disclosure: April 1, 2020

The Qualified Entity (QE) listed above receives public funding from New York State to provide a variety of technology services to its members as part of the Statewide Health Information Network of New York (SHIN-NY). QEs must use these funds to provide a minimum set of services (“dial tone” or core services and member facing services) to their members at no charge. QEs are permitted to offer additional services as “value added” services to their members for which they may collect a fee. This document provides a summary of available services as of the date listed above. New York State QEs are required to provide this disclosure to prospective QE participants and upon request at any time. Up to date disclosure forms are posted here: [www.bronxrhio.org](http://www.bronxrhio.org)

### Description of Disclosure Table Headings:

- Service: Name of the service offered
- Description: A description of the named service. Further detail is available from the QE. A more detailed description of dial tone or core services can be accessed here: <http://www.nyhealth.org/shin-ny/shin-ny-services>
- Service Availability: Status of the capability. There are 3 possible responses in this column
  - Available = Indicates the Service is Available for all Members
  - Partial: Date = The service is partially available. The date is the estimated date for full availability. Additional notes on partial availability may be included at the end of the table
  - Date Only = Service is currently unavailable and projected to be available on the date specified
- Service Cost: Fee charged for the described service. QE may bundle services together into a single fee and will describe this in the notes to this disclosure. QE should document the frequency of the fee (one-time, monthly, quarterly, annual, etc.)
- Cost to Configure / Reconfigure: Both the initial configuration and any fees for reconfiguration in the future. The first figure is the initial upfront cost to enable the service and the second is any fee for reconfiguration in the future. If there is no fee for one or the other, this should state \$0 / \$0. The referenced notes (if any) at the end of the disclosure describe what circumstances would necessitate a reconfiguration fee.

	Service	Description	Service Availability	Service Cost	Cost to Configure / Reconfigure
Dial Tone/Core Services	Patient Record Lookup (Community Level – within a Single QE)	The ability to search for a patient’s prior clinical records contained within the QE via a web-based viewer or from within a 3 <sup>rd</sup> party application (e.g. an EHR)	Available	\$0	Initial: \$0 Reconfigure: \$0
	Patient Record Lookup (Statewide – all QEs)	The ability to search for a patient’s prior clinical records contained throughout the SHIN-NY and all of New York State’s connected QEs via a web-based viewer or from within a 3 <sup>rd</sup> party application (e.g. an EHR)	Available	\$0	Initial: \$0 Reconfigure: \$0
	Secure Messaging by Direct from an EHR	The ability to connect an EHR to a HISP hosted by the QE. A message addressed from within the EHR is routed by the QEs HISP to any other Direct capable recipient’s Inbox	Available	\$0	Initial: \$0 Reconfigure: \$0

	Single Sign On Services	Single Sign On to RHIO Integrated with EMR	Available	\$0	Initial: \$0 Reconfigure: \$0
	Data Availability Notification Services	Notification in EMR if Community Data Available in RHIO	Available	\$0	Initial: \$0 Reconfigure: \$0

Footnotes:

- 1) The Bronx RHIO charges participants a single, annual fee for value added services. The annual fee is calculated based on participant type (i.e. hospital, nursing home, physician practice, etc.) and is based on the prevailing Board-approved fee schedule. Current fees for standard participant types range from \$260-\$130,000 per year.
